Kursnummer: 251441

Ort:	AZ Weiherweg , Bahn 1	
	<u>Adresse:</u>	
	Rudolfstr. 43	
	4054 Basel	
Lerninhalt:	In parent-child swimming, the natural urge to move of 1 to 4 year olds	
	is used sensibly and lived out without pressure to perform. The basic	
	movements in the water, such as diving or jumping, are practised and	
	encouraged together. The children participate in the community	
	activities through circle and singing games. In different groups,	
	depending on the age of the children, creativity, play and fun are	
	provided for. The parent-child relationship is intensified through	
	conscious physical contact, eye contact and attention to the child. The	
	child moves itself, but also feels safe and comfortable with the support	
	of the parents.	
	Advantages for you and your child:	
	- The parent-child bond is strengthened.	
	- Blood circulation is stimulated, all parts of the body are supplied with	
	oxygen, which makes the children fit and more receptive.	
	- The respiratory muscles are strengthened and the lung function	
	improved by the water pressure and resistance.	
	- Strengthening of the supporting and postural muscles	
	- Gross and fine motor skills are promoted	

- Contact with other children promotes social competenceals Trockenübungen
