| Lerninhalt: |   |  |  |
|             | AQUA-GYM FOR PREGNANT WOMEN   |  |  |
|             | Sport during pregnancy promotes physical fitness and can thus preventy typical pregnancy complaints.  |  |  |
|             | <b>Aqua-gym for pregnant women</b> stands out as an extremely joint-<br>friendly and gentle way of exercising, which pregnant women can do<br>despite their increasing weight. The buoyancy in the water relieves the<br>joints and intervertebral discs as well as the complete back<br>musculature.   |  |  |
|             | Aqua-Gym for pregnant women promotes endurance, strengthens the<br>muscles and stimulates the circulation through targeted exercises. The<br>movement generally provides a better oxygen supply for the whole<br>body. In addition, exercise stimulates venous return, which can reduce<br>the tendency to pregnancy edema and varicose veins. Coordinated<br>exercises make the pelvic floor more elastic and thus promote a quick<br>and problem-free recovery of the tissues after childbirth. |  |  |
|             | Aqua-Gym for pregnant women takes place in chest-deep water at 32°C. It is possible to join at any time. Lessons are charged from the date of entry until 2 weeks before the due date.  |  |  |
|             | If you have any further questions, don't hesitate to <b>contact us!</b>   |  |  |
